Alpine STRUCTURES

Built On-Site & Pre-Built Structures
Not all buildings are created equal.

It all started one winter many years ago, in a small shop where our first storage barns were built. By the end of the year, our founder, Mose Miller, realized the need for storage buildings, and in 1981 Alpine Structures was born. As we continue to grow, Alpine Structures remains dedicated to providing high-quality products with excellent customer service. Our success is credited first and foremost to God who has blessed us abundantly with wonderful employees and loyal customers.

Javan Miller, owner

The Difference

Alpine difference

Aluminum Dripedge

Added protection against rain, snow, and ice.

Smartside Soffit and Frieze Board

Standard on Skyview, Cove, and Frontier. Optional on all other styles.

Metal Truss Plates

Provides superior strength versus wooden gussets.

Double 2x8” top-plate

On Alpine Barnstyles, the rafter is located on outer edge of 2x8” top-plate. Increases wall strength and provides more loft storage.

Primed Trim

Standard on all buildings except barnsiding. Decay resistant, primed trim that is ready to face the outdoors.

warranty

We’ve been here since 1981 and we’re committed to continue giving you complete satisfaction.

warranty
the triple-layer door system

Layer #1 – Our 2x3” Door frame is built with premium grade lumber and fastened with a metal truss plate for superior strength.

Layer #2 – LP Smartside Siding that resists warping and cracking, and defies termite damage.

Layer #3 – Decay resistant primed trim that is ready to face the outdoors.

Spring-loaded barrel bolts. Included on top and bottom of door.

Metal truss plates for superior strength.

6” Heavy-duty T-hinges with bushings. Standard on Alpine & 2000 Series.

12” Decorative T-hinges with bushings. Standard on EZ-Fit Sheds.

Restructure your backyard
Alpine strongback nailer

- A STRONGER WALL
- A STRAIGHTER WALL
- INCREASED NAILING SURFACE
- STANDARD ON ALL HIGH SIDEWALLS

Using computerized components saws, each individual wall stud is cut with a specialized notch. We then install our 2x3" Strongback Nailer, creating a *straighter, stronger wall*, and providing *increased nailing surface* for our siding panels.
Why are the floor joists flat vs. on edge?

**Structural Integrity** – Flat joists mean more holding power by face-nailing floor joists to 4x4” runners vs. toe-nailing.

**Larger support area** – Actual distance between floor joists is only 12½”!

**Ease of use** – Enjoy a minimal step up into your building with this user friendly design.

### 2000 Series

Floor: ½” CDX Plywood-16" O.C. floor joists
4x4” treated skids

Walls: 24" O.C. wall studs

### Standard Model

Floor: ¾” CDX Plywood-16" O.C. floor joists
4x4” treated skids

Walls: 24” O.C. wall studs

### Deluxe Model

Our signature series — the Alpine Structures are bigger buildings, with flexible options. Building sizes start at 8x8' all the way to 16x32' and include special features like a 12'' overhang on gable ends and air vents. Careful consideration should be taken when choosing the flooring, the Alpine Structures are available in standard, deluxe and supreme models, for more information see page 7.

Site Prep

Alpine Structures offers several of these site-prep options. Ask your salesman for availability in your area.

**SMALL STRUCTURES**

1. Limestone base should be 12” larger than building on four sides.
2. Remove 3-4” of sod.
3. Fill back in with No. 8 or No. 57 limestone.
4. Make sure entire area of limestone is level.

8”x16” x 2” thick concrete patio blocks are placed underneath each skid a maximum of 6’ on center.

4x4”s are placed crossways underneath building. 4x4” supported with solid concrete blocks on low side and dug into ground (as needed) on high side.

**LARGE STRUCTURES**

Pressure/treated posts with 2x8” stringers for sloped applications.

Pressure/treated posts 8’ o.c. with 2x8” treated rim boards and 2x8” treated cap.

Block foundation with frost protected footer and concrete floor.
An Attractive, Durable Finish For Sheds

A flooring designed and warranted specifically for sheds, LP® ProStruct® Flooring with SmartFinish® features a durable overlay for a beautiful, professional-grade appearance. With no knots or voids, it's a welcome change from building with traditional plywood flooring. Plus, unlike plywood shed floors, LP® ProStruct® Flooring with SmartFinish® is treated with the LP® SmartGuard® process for longer-lasting performance in a variety of climates/weather.

Features & Benefits

A Shed Floor With Protection Against Decay & Damage
The shed floor you’ve been searching for is here, specially treated with SmartGuard® wood strand technology to resist fungal decay and termite damage.

An Easy Shed Floor Install
The LP® ProStruct® Flooring with SmartFinish® installs like conventional floor panels.

Knot and Void Free
Durable overlay for a professional-grade appearance with no knots or voids so your shed floor is as durable as it is attractive.

Longer-Lasting Performance
SmartFinish® flooring has excellent resistance to warping, splitting and cupping.
Siding Options

LP SmartSide Siding
Standard on all buildings

A Natural Defense Against Nature
All LP® SmartSide® products are treated to the core through LP’s proprietary SmartGuard® process. With four components of protection, the SmartGuard process adds strength and helps LP SmartSide products withstand impacts, freeze/thaw cycles, high humidity, fungal decay and more. Smartside siding is backed by a 50 year prorated limited warranty.

We’re proud to offer SmartSide® standard on all of our buildings.

Waxes
Special water-resistant waxes coat each strand or fiber of wood for enhanced durability in rainy, humid environments.

Zinc Borate
Engineered wood products treated with zinc borate have been proven to effectively resist damage from termites and fungal decay for decades. Safe for children and pets, this naturally occurring additive provides long-lasting performance that preserves the beauty of LP SmartSide Trim and Siding.

Resin-Saturated Overlay
Offering the final layer of protection against the elements, a resin-saturated overlay resists moisture intrusion while providing a durable base for quality paint adhesion and beauty.

Advanced Binders
LP SmartSide Trim and Siding provide incredible strength to resist impact damage thanks to their industrial grade binders and resins. You’ll have the confidence of knowing that your siding can stand up to everyday airborne debris such as hail, sticks, or golf balls.
LP Horizontal Lap Siding

Standard features
