Not all buildings are created equal.

It all started one winter many years ago, in a small shop where our first storage barns were built. By the end of the year, our founder, Mose Miller, realized the need for storage buildings, and in 1981 Alpine Structures was born. As we continue to grow, Alpine Structures remains dedicated to providing high-quality products with excellent customer service. Our success is credited first and foremost to God who has blessed us abundantly with wonderful employees and loyal customers.

Javan Miller, owner
quality from the inside out

5 YEAR WARRANTY
discover the **Alpine difference**

**Aluminum Dripedge**
Added protection against rain, snow and ice.

**Cedar Trim**
Standard on barnsiding buildings.

**Primed Trim**
Standard on all buildings except barnsiding. Decay resistant primed trim that is ready to face the outdoors.

**Metal Truss Plates**
Provides superior strength vs. wooden gussets.

**Double 2x8” top-plate**
On Alpine Barnstyles—rafter is located on outer edge of 2x8” top/plate...increases wall strength and provides more loft storage.

---

**warranty**

We’ve been here since 1981 and we’re committed to continue giving you complete satisfaction.
the *triple-layer* door system

**Layer #1**...Our 2x3” Door frame is built with premium grade lumber and fastened with a metal truss plate for superior strength.

**Layer #2**...Siding of your choice, (smartside, duratemp, barnsiding, or LP lap siding)

**Layer #3**...Decay resistant primed trim that is ready to face the outdoors.

---

Spring-loaded barrel bolts. Included on top & bottom of door.

Metal truss plates for superior strength.

6” Heavy-duty T-hinges with bushings. 
*Standard on Alpine & 2000 Series.*

12” Decorative T-hinges with bushings. 
*Standard on EZ-Fit Sheds.*
Alpine strongback nailer

- A STRONGER WALL
- A STRAIGHTER WALL
- INCREASED NAILING SURFACE
- STANDARD ON ALL HIGH SIDEWALLS

Using computerized components saws, each individual wall stud is cut with a specialized notch. We then install our 2x3” Strongback Nailer, creating a *straighter, stronger wall*, and providing *increased nailing surface* for our siding panels.

*close-up view of strongback nailer*

*cutting-edge equipment*
Q. Why are the floor joists flat vs. on edge?

A. **Structural Integrity**... Flat joists mean more holding power by face-nailing floor joists to 4x4" runners vs. toe-nailing.

A. **Larger support area**... actual distance between floor joists is only 12 ½"!

A. **Ease of use**... Enjoy a minimal step up into your building with this user friendly design.

---

**2000 Series**

- **Floor:** ½" CDX Plywood-16" O.C. floor joists
  - 4x4" treated skids
- **Walls:** 24" O.C. wall studs

**BEST SELLER**

See page 51
Our signature series — the Alpine Structures are bigger buildings, with flexible options. Building sizes start at 8x8' all the way to 16x32' and include special features like a 12'' overhang on gable ends and air vents. Careful consideration should be taken when choosing the flooring, the Alpine Structures are available in standard, deluxe and supreme models, for more information see page 7.

“Excellent installers - great work!”
James from Export, PA
October 2020
Alpine Structures offers several of these site-prep options. Ask your salesman for availability in your area.

**SMALL STRUCTURES**

1. Limestone base should be 12” larger than building on four sides.
2. Remove 3-4” of sod.
3. Fill back in with No. 8 or No. 57 limestone.
4. Make sure entire area of limestone is level.

**LARGE STRUCTURES**

- **post and beam foundation**
  Pressure/treated posts with 2x8” stringers for sloped applications.

- **post and rim foundation**
  Pressure/treated posts 8’ o.c. with 2x8” treated rim boards and 2x8” treated cap.

- **block foundation**
  Block foundation with frost protected footer and concrete floor.

**level limestone base**

8”x16” x 2” thick concrete patio blocks are placed underneath each skid a maximum of 6’ on center.

**patio block base**

4x4”s are placed crossways underneath building. 4x4” supported with solid concrete blocks on low side and dug into ground (as needed) on high side.

**block/4x4” foundation**

www.alpinestructures.net
A floor worth looking up to

**LP ProStruct Flooring with SmartFinish**

*Deluxe Model Flooring Package*

LP ProStruct Floor with SmartFinish offers an attractive overlay for a beautiful, professional-grade appearance on sheds and other outdoor structures. With no knots or voids, it’s a welcome change from traditional plywood flooring.

- Only floor product specifically engineered and warranted for shed use
- Beautiful, durable overlay for a premium appearance inside
- Treated engineered wood technology for enhanced substrate durability
- Treated with the SmartGuard® process for longer-lasting performance in tough climates
- 10-year prorated limited warranty on substrate
- 1-year, 100% labor and replacement feature
- Backed by a 1/10-year limited materials warranty so you can build with security and confidence
- Installs like conventional floor panels

**Siding Options**

**Smartside Siding**

*Standard on all buildings*

SmartSide® products deliver all the warmth and beauty of traditional wood, plus the durability and workability of engineered wood. The SmartGuard® manufacturing process actually improves upon nature, creating products that are engineered for strength, performance and protection against fungal decay and termites.

We’re proud to offer SmartSide® standard on all of our buildings.

- 10-year prorated limited warranty on substrate
- 1-year, 100% labor and replacement feature
- Backed by a 1/10-year limited materials warranty so you can build with security and confidence
- Installs like conventional floor panels

**key advantages**

- 50 year prorated, limited warranty.
- Treated with a Zinc Borate treatment.
- Resistant to fungal decay and termite damage.
- Attractive overlay on the interior
- Primed face
